TALPAC Calibration

Overview

This course teaches participants how to simulate productivity and cost of equipment using RPM's TALPAC solution. The course teaches students the core functionality of the product through pre-configured workshops that are designed around real life scenarios.

Learning Outcomes

- Learn how to navigate around the software.
- Know how to access product help documentation.
- Create and/or update a mine simulation.
- Learn how to import data into the simulation.
- Understand the equipment database.
- Learn how to use dashboards and reports.
- Analyse impacts of changes to the simulation.

Who is the Course For?

- Mine Scheduling / Planning Engineers
- Mine Manager / Superintendents
- Senior Operations Personnel
- Equipment Manufacturers
- Business Improvement Specialists

Delivery Mode

Classroom

Duration

One Day
