

Announcement

Partnership with Chasm Consulting for Ventsim Mine Ventilation Software

15 June 2017

RPMGlobal Holdings Limited (ASX: RUL) (**RPM**) has today entered into a software integration agreement with Chasm Consulting Pty Ltd (**Chasm**) to enable RPM and Chasm to further develop an integration between the industry leading Chasm mine ventilation software Ventsim™, with RPM's Underground software solutions.

Chasm Consulting's Ventsim product is the leading underground mining ventilation software and was originally introduced to mining operations in 1994 to help visually design, improve and optimise underground ventilation systems. It is now licensed to over 1000 mine sites, consultants, universities, governments and research agencies around the world.

Under the integration agreement, RPM and Chasm will collaboratively develop tight integration between RPM's Underground Solutions and Chasm's Ventsim solution, allowing joint customers to quickly simulate mine ventilation as the mine develops.

Commenting on the new software integration partnership, RPM's CEO and Managing Director Richard Mathews said "We are pleased to have entered into the software integration agreement and partnership with Chasm Consulting that will allow RPM and Chasm to continue their work to develop the integration between our market leading solutions"

"With over 1000 customers of the Ventsim solution, they are clearly the industry leader in underground mine ventilation and we look forward to furthering the integration of our respective products to deliver real value to our underground mining customers."
